

Intestinal Reconstruction Surgery In Neonates And Children

Tuesday 6th, Wednesday 7th & Thursday 8th May 2014, University of Salford, Greater Manchester

The Master Course in Intestinal Reconstructive Newborn Surgery is a three-day intensive practical program designed to familiarize physicians with the applications of the latest autologous bowel reconstruction techniques through live surgeries and interaction with faculty members. The Master Course aims to fill a space in the basic training that is considered essential in the professional curriculum of every surgeon, regardless of surgical specialty reference

Learning Objectives:

Upon completion of the course, participants should be able to:

- Be familiar with the most common lengthening techniques.
- Organise and manage a successful intestinal bowel surgery programme.

Full programme and agenda can be found at www.salford.ac.uk/spd and clicking on 'upcoming courses'.
